

KALKI

SOFTWARE ENGINEER — AI Enthusiast — C++ Python Developer

+91-8168680684 kalkikumar2211@gmail.com <https://www.linkedin.com/in/kalki-2386b6317/>

Objective

Bachelor of Computer Applications student with 8.75 CGPA, skilled in C++, Python, Data Structures Algorithms, OOP, and AI fundamentals. Passionate about software engineering and problem solving. Seeking Software Engineering Internship opportunities to apply technical skills and gain industry experience..

Skills

Programming & Querying: Java, Core Java, OOP, C++

Backend Databases: Java, JDBC, Node.js, MySQL, SQL, MongoDB

Version Control: Git GitHub

Experience

Machine Learning using Python

June 2025 - August 2025

Overview

Tools Used: Jupyter Notebook, Google Colab, Git, Github, Vs Code

- **Developed and trained machine learning models using Python and Scikit-learn for classification and prediction tasks, gaining hands-on experience with the complete ML workflow.**
- Performed data preprocessing, cleaning, feature selection, and exploratory data analysis (EDA) using Pandas and NumPy to improve dataset quality and model performance.
- Created data visualizations and analytical reports using Matplotlib and Seaborn to identify patterns, trends, and insights from datasets.
- Evaluated model performance using metrics such as Accuracy, Precision, Recall, and Confusion Matrix, and optimized models through parameter tuning and validation techniques.

Projects

Linux Server Monitoring System — Python — Linux — System Monitoring* | Java

June

- **Developed a server monitoring solution to track CPU usage, memory utilization, disk space, and system performance in real time.**
- Implemented automated alerts and logging mechanisms to identify potential system issues and improve reliability.
- Generated performance reports to support system administration and troubleshooting.
- Designed the application with scalability and maintainability in mind for Linux-based environments.

AI-Based Face Recognition Attendance System | MATLAB — Computer Vision — Image Processing — Machine Learning

- Developed an intelligent attendance management system that automates attendance tracking using facial recognition technology, eliminating the need for manual attendance processes.
- Implemented face detection, feature extraction, and face recognition algorithms in MATLAB to accurately identify registered individuals from captured images.
- Designed and maintained a structured attendance database to store user information, attendance records, and recognition results, improving record management efficiency.
- Applied image preprocessing techniques such as image enhancement, face segmentation, and pattern matching to improve recognition accuracy and system reliability under varying conditions.

Awards & Certifications

- **IBM ICE Program for Non-Tech – Cyber Security — IBM ICE — Dec 2024**
- **Industrial Training – Machine Learning with Python — Agratas Edutech — 2025 – Acquired hands-on experience in Python, data analysis, machine learning algorithms, and predictive model development.**
- **Machine Learning with Python Internship — Agratas Edutech — Jun 2025 – Aug 2025 – Developed and evaluated machine learning models using Python, Scikit-learn, and data preprocessing techniques on real-world datasets.**

Education

BCA.Bachaelor of Computer Application

2024-2027

Noida International University(Gautam Budh Nagar)
